Specification

1. The specification is objected to as failing to provide proper antecedent basis for

the claimed subject matter.

The specification lacks clear antecedent basis for the thickness of the bushing

hole being 2.0 times greater than that of the coupler pin hole as set forth in claim 5.

Applicants' explanation on page 14 of the response is noted. However, since the

detailed portion of the specification sets forth the range of 1.1 to 1.5 and preferably 1.3

times the thickness (pages 16 and 17) and does not mention that the range can extend

up to 2.0 (and actually appears to teach against a ratio higher than 1.5 on page 17) it is

felt that the specification is ambiguous as to the range of the thickness ratio and does

not provide clear and proper antecedent basis for the ratio set forth in claim 5. The

description on pages 16 and 17 appear to be at odds which the description on pages 7

and 8, and it would seem to be desirable to provide clear antecedent basis in the

detailed description of the invention.

See 37 CFR 1.75(d)(1) and MPEP § 608.01(o).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

Art Unit: 3617

3. Claims 1, 5, 6, 7, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Maguire et al.

Maguire et al (newly cited) shows alternating external and internal links having a coupler pin, a fixed bushing, and a sealing ring.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maguire et al in view of Lawson (previously cited).

For the outer surface of the internal link of Maguire et al to be provided with a raised portion around the bushing hole would have been obvious as taught by Lawson as shown in figure 2 as this would provide a better interfitting of the inner and outer links.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 8, and 9 have been considered but are most in view of the new grounds of rejection.

The limitations of the external and internal links required the use of the Maguire et al patent.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell D. Stormer whose telephone number is (571) 272-6687. The examiner can normally be reached on Monday through Friday, 9 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joe Morano can be reached on (571) 272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
